

Bi-weekly Adolescent Update X

The students spent last week preparing for the Coffee House on Thursday night. With Monday off from school due to the snow, they had limited time to prepare for their performances. They worked hard on their pieces, editing, practicing, and rehearsing, and came together as a group. In the end, they did a beautiful job working together and individually to make the night so successful.

On Friday, to celebrate their success and take a break for the last day of the term, we went to see The Monuments Men, and had a lively lunch out at TGI Fridays.

This week, with the beginning of the new term, the students began a new Occupations unit with Ms. Louise. They began their study of astronomy with a look at the sun, the electromagnetic spectrum, and an experiment testing conductivity.

The students have moved into some new concepts in math, including logarithms and inequalities. They thoroughly enjoyed playing Bingo in French, and their first Krav Maga lesson of the term.

This morning, the students made beautiful handcrafted Valentine's Day cards. Many thanks to Ms. Kim for providing us with the makings for pizza, which the students prepared and enjoyed!
